INTRODUCTION

The Hu-lu-tao Hydro Power Plant is located on the west bank of the Yalu River, approximately 0.5 nautical miles (nm) northwest of Hu-lu-tao, China and 0.6 nm west of the Hu-lu-tao Dam Unbong [REDACTED]

25X1A

BASIC DESCRIPTION

25X1D
25X1D
Between [REDACTED] the cut-off date of the referenced report, and [REDACTED] the surge tanks at this plant were completed and the plant became operational.

Water is supplied to the plant through two conduits from the reservoir created by the Hu-lu-tao Dam. The two water intake buildings are located about 0.3 nm north of the dam. The powerhouse has four water discharge outlets, indicating that there are four turbogenerators.

25X1D
Water turbulence was observed in the tailrace on all referenced imagery except on [REDACTED]. On these dates water turbulence could not be determined because of imagery scale.
